Using Alphabets

The help system in each of Melco's embroidery software products contains code sheets for all of the available alphabets. To access these code sheets, select
Help->Help Topics in the Help pull down menu, or press F1 while in any Melco embroidery software product. Then click on the Alphabets button to access the code sheets. Each code sheet provides a 3D view of the characters. The code sheets also include a chart of all the European or extended characters available in each alphabet.

All of the alphabet code sheets also contain a recommended minimum and maximum sewing size. This recommended parameter should be used and followed, but this does not mean that exceeding these limits will produce bad results. Many of the alphabets can be used at larger or smaller sizes if parameters such as Column Width, Letter Width, Density, Short Stitches, Column Fill and Underlay are adjusted accordingly.

To fully understand Melco keyboard lettering, it must be understood that every character is digitized separately and is then compiled and put into one unique alphabet file that is understood by Melco EDS software. As each character is individually digitized, each alphabet will react differently to size and parameters used when setting up the desired lettering. Some alphabets are digitized to be used at smaller sizes than others. Parameters used for one may not sew the same for another.

Closest point alphabets are digitized so they will connect at the closest point of each letter next to each other. Using these alphabets will minimize unwanted trims between letters. A closest point alphabet will be listed in the lettering list with a "CP" on the end. An example will look like this: FULL BLOCK CP.

The most important practices to ensure good results are using proper settings for the garment type being sewn on and using the proper backings and/or topping. All alphabet code sheets produced before July of 2001 have a minimum and maximum setting. These settings were determined on a non-stretch type of material. The settings may need to be adjusted for use on knit or sweat materials. All new alphabets code sheets recommend settings for knits, sweats and non-stretch fabrics. These settings are a good starting place, but may need adjusting for the particular garment material being used. Knit materials for instance, can vary in material density, thickness and how much they stretch. Settings for one type of knit material may not work 100% for another.

Following the tips below may improve your sew quality when using keyboard lettering on knit and sweat materials:

- As a general rule, when sewing on knit or sweat materials, column width should be increased.
- Proper backings should be used, and in most cases a topping such as solvy should also be used.
- Many of the recommended minimum settings listed in Melco alphabets will not work on knits or sweat material and may need to be adjusted to different values. When increasing the column width to compensate for material type, the letters that have enclosed areas such as an "a" may close in thecenter when sewn. If you notice this, you should increase the size of the lettering to allow for the added column width.
- In most cases when sewing on knits or sweats an edge walk underlay is desired, and in some cases (larger sizes) an edge walk along with a center walk should be used. Very thin column lettering may only require a center walk at small sizes.
- Density on knits and sweats is usually set higher than on a stable material.

- Block styles of alphabets used at small sizes sew much cleaner and crisper than script alphabets at the same size. In most cases when sewing small lettering on knits or sweats, a block style of alphabet without serifs will give the best results.
- Using some scrap material for testing that is like the garment to be sewn on is highly recommended until you determine what works best for you and your machine(s).

Most alphabets currently being sold by Melco contain lock stitches at the end of each letter in the alphabet. These lock stitches are what "ties down" the stitching at the end of each letter. Melco embroidery software products allow you to add lock stitches to a lettering job from the Lock / Trim tab. However, because the lock stitches are already digitized into the alphabet, the result is multiple lock stitches that will create an undesirable knotting effect. To remove all existing lock stitches from all installed alphabets, select **Tools->Convert Alphabets** in the Tools pull-down menu. Select **Tools->Restore Alphabets** to restore the lock stitches digitized to the alphabet characters if so desired.

Unlike lock stitches, tie in stitches are usually not digitized into the current alphabets. Tie in stitches lock stitches that are sewn at the beginning of each letter. You may want to use this feature when trimming between each letter to avoid a possible "thread pullout" when the machine starts sewing the next letter after a trim.

Following are a few recommendations that you may want to try when sewing keyboard lettering.

Large letters

If the alphabet letter height is increased beyond the maximum recommendation, sew quality may suffer. The column stitch may become too wide, and this can create an undesirable effect.

Following the tips below may improve your sew quality when using keyboard lettering for large letters:

- Change the column stitch type from a satin stitch to a fill stitch. The stitch count will increase, but the sew quality will improve.
- You can also reduce the column width (Pull Comp.) to create thinner letters and avoid the wide column stitch.
- Zigzag or Edge Walk underlay will help to stabilize the stitches on the fabric.

Small letters

Following the tips below may improve your sew quality when using keyboard lettering for small letters:

- Turn off short stitches for small letters. This can improve sew quality as well as help to reduce thread breaks.
- Increasing the column width (Pull Comp.) will keep the lettering from sinking into a knit. Different alphabets will require different column widths, as they are all different in width at the default value.
- The column density value should be increased. The value will depend on the fabric.
- The stitch length should be in the range of 18 - 25.

Alphabets Home Page

2 Color Full Block

This alphabet contains:
- Letters: A through Z (upper and lowercase)
- Numerals: 0 through 9
- Punctuation and Symbols: "(!#&',.;:/-+=?)"
- Lock Stitches: Yes

Minimum letter height: 1.00" (2.54cm)
Maximum letter height: 3.00" (7.62cm)
Stitch length: 25-35 pt

For double left quotes, press: *
For double right quotes, press: "

DesignShop/ EDS IV/ EZ/ EDS III/ p/n: 93391101

EDS II/ EPICOR p/n: 96491101

ABCDEFGHIJKLM
NOPQRSTUVWXYZ
abcdefghijklm
nopqrstuvwxyz
1234567890
"(!?:;+-.,'&/%#=)"

3 Letter Circle

This alphabet contains:
- 10 borders for 3-letter monograms
- 5 borders for 2-letter monograms
- Lock Stitches: No

DesignShop/ EDS IV/ EDS III/ p/n: 93391072

EDS II/ EPICOR p/n: 96491072

Minimum letter height: 0.50" (1.27cm)
Maximum letter height: 5.00" (12.70cm)

Stitch length for designs 0 9 # ": 15 pt or .05 in.

The keyboard character for each design is located on the bottom right of the displayed border on this code sheet.

| 1 | 2 | 3 | 4 | 5 |

MAIN INDEX

3 Letter Diamond

This alphabet contains:
10 borders for 3-letter monograms
6 borders for 2-letter monograms
Lock Stitches: Yes

DesignShop/ EDS IV/ EDS III p/n: 93391023
EDS II/ EPICOR p/n: 96491023

Minimum letter height: 0.50" (1.27cm)
Maximum letter height: 7.00" (17.78cm)

The keyboard character for each design is located on the bottom right of the displayed border on this code sheet.

Please note that characters that are closed at the top (such as *B*) will not work with Border #2. Also note that characters that are closed at the bottom (such as *U*) will not work with Border #3. In the example below, H is open at the top and the bottom, so it will work with Border #2 and Border #3.

MAIN INDEX

Athletic Fill #2

This alphabet contains:
- Letters: A through Z (uppercase)
- Numerals: 0 through 9
- Lock Stitches: Yes

DesignShop/EDS IV/EDS III/ p/n: 93391007
EDS II/ EPICOR p/n: 96491007

Minimum letter height: 1.00" (2.54cm)
Maximum letter height: 6.00" (15.24cm)

Fill with border: use standard key strokes except press = for (.) and press / for (,)

Border only: use lower case keys for letters A - Z, press - for (.) and press & for (,). Also refer to the following chart for the keyboard characters required to display numbers 0 -9 (border only):

To sew	Press	To sew	Press
1	!	6	'
2	?	7	'
3	:	8	"
4	;	9	(
5	.	0	)

MAIN INDEX

Athletic Flair

This alphabet contains:
- Letters: A through Z (upper and lower-case)
- Numerals: 0 through 9
- Punctuation and Symbols: ("!#&',.;:/-=?)
- Lock Stitches: Yes

DesignShop/EDS IV/EDS III p/n: 93391049
EDS II/ EPICOR p/n: 96491049

Minimum letter height: 0.30" (.762cm)
Maximum letter height: 1.50" (3.81cm)

If your lettering contains characters that normally extend below the baseline (e.g., g p y j q_) use the "far" flair. If your lettering contains none of these characters, use the "close" flair. See examples to the right:

MAIN INDEX

Micro Alphabet Series

The follwing alphabets contain:
- Letters: A through Z (uppercase)
- Numerals: 0 through 9
- Punctuation and Symbols: "!?:;-.,'&/#
- Lock Stitches: Yes

DesignShop/ EDS IV/ EZ/ EDS III p/n: 933911XX
EDS II/ EPICOR p/n: 964911XX
(the last two digits for each alphabet are below)

Minimum and Maximum sizes are below
Recommended parameters:
- 3.7 to 4.5 density
- 12pt to 25pt stitch length
- letter width (EDSII/III, -20 to +20) EDS IV, DesignShop 80% to 120%

- column width (EDS II/III, 0 to +2) EDS IV, DesignShop, 100% to 120%
- short stitches off
- use "lock stitches on" or "auto lock" for letters larger than .25"

By entering capital letters, letters will exit at top.
By entering lowercase letters, letters will exit at bottom.
By combining capital and lowercase letters you can create words that connect closely and require little or no hand trimming finish work.
Example:
TournameNt
The first "T" exists close to the "o" and the second "N" exists at the top ready to start the second "t".

Micro Block: p/n 36 Sizes, .18" to .35"

Micro Full Block: p/n 37 Sizes, .20" to .35"

Micro Times: p/n 38, Sizes .25" to .40"

Mini Micro Times: p/n 39, Sizes .17" to .25"

Collegiate Block: p/n 35 Sizes: .20" to .35"

10″ p/n: EDS II - 96491037 DesignShop/EDS III/ IV - 93391037
Lock Stitches: Yes

- Set the letter height equivalent to the Tackle Twill alphabet that you are using, i.e. 2.00″ letter height when using 2″ Tackle Twill.
- The recommended density for these alphabets is anywhere from 10 points to 20 points. At 20 points the job will sew faster, but you may want less than 2mm between stitches.
- The 2″, 4″, and 6″ alphabets contain uppercase letters A thru Z and numerals 0 thru 9.
- The 6″ alphabet is a 1 color alphabet; it contains a color change command between the outline stitching and the tack-down stitching.
- The 8″ and 10″ alphabets contain numerals 0 thru 9 only.
- The 2″, 4″ 8″ and 10″ alphabets contain 3 color change commands: 1 between the outside outline and the outside tack-down; 1 between the outside tack-down and the inside outline; and 1 between the inside outline and the inside tack-down.

Steps:
1. An outline walkstitch sews first then a color change command (machine will stop).
2. Use kk-100 spray adhesive to glue material down, using the outline as a guide.
3. Press START and the machine will sew the tack-down stitch around the base material. The machine will stop when this stitching is done. The 6″ alphabet will be done at this point.
4. Press START and the machine will sew the outline stitch for the top material. The machine will stop when this outline stitch is done.
5. Use kk-100 spray adhesive to glue the top material down, using the outline as a guide.
6. Press START and the machine will sew the tack-down stitch around the top material.

Design Shop/ EDS IV p/n: 933912-44
This alphabet contains:
- Letters: A through Z (uppercase only)
- Numerals: 0 through 9
- Punctuation and Symbols: !#%&'( )*,-./ :;=?@
